

Setup 2FA for VPN (MAC):

Download the mobile app “Google Authenticator”

1. Go to Google Play Store on Android devices or App Store on Apple devices and search for Google Authenticator.

2. Click on install

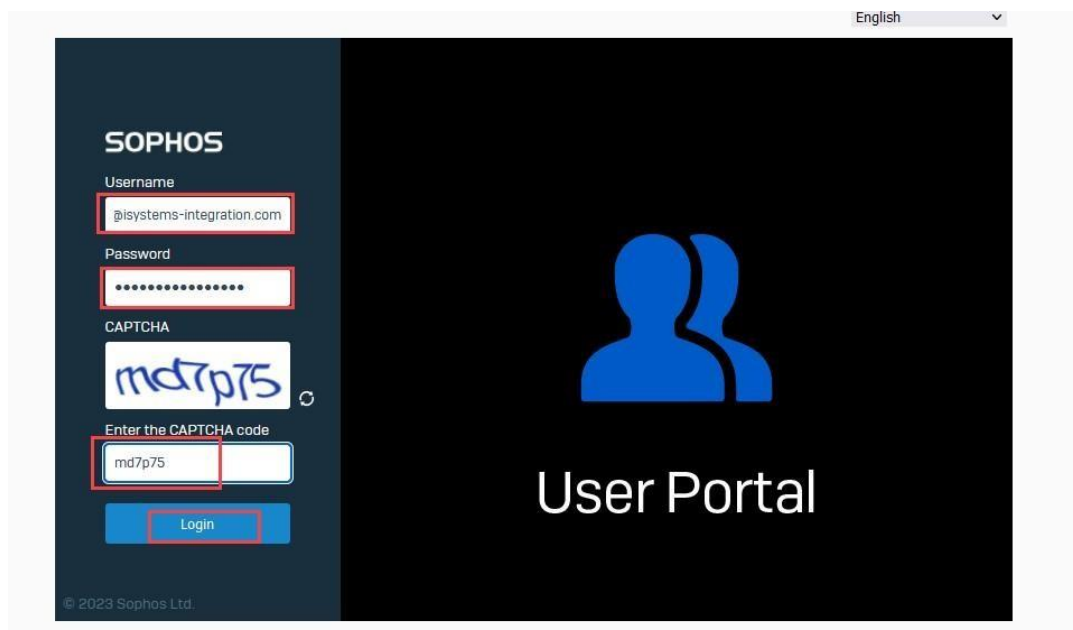

Setup 2FA

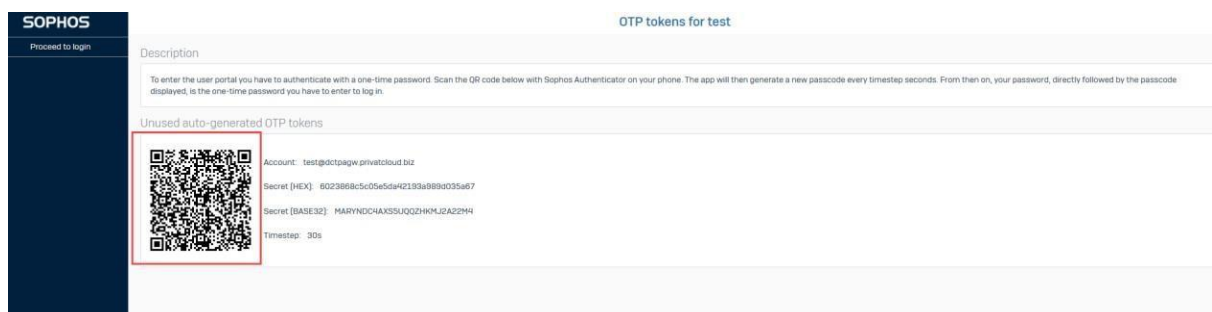

1. Go to <https://dctpaportal.privatcloud.biz>

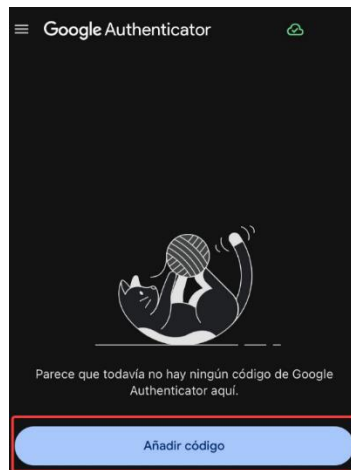

2. Login with your VPN credentials

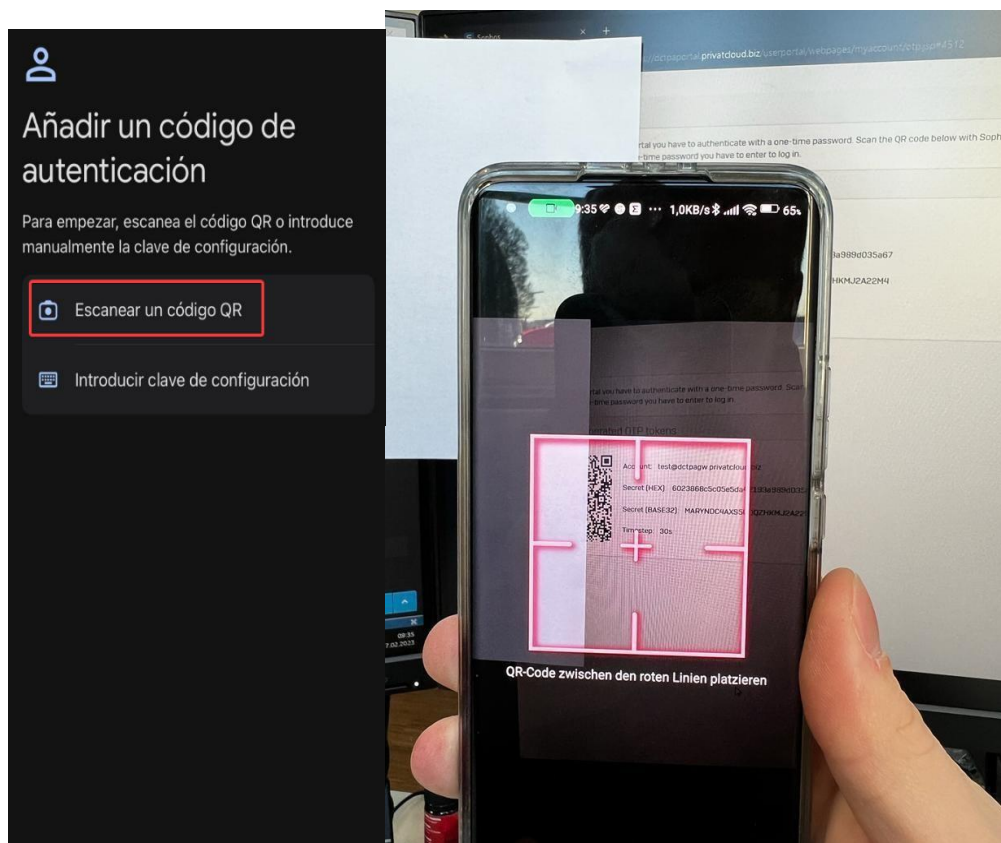

3. A QR Code will appear

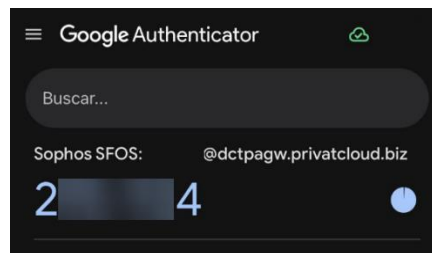

4. Open Google Authenticator on your phone and tap on the add code option.

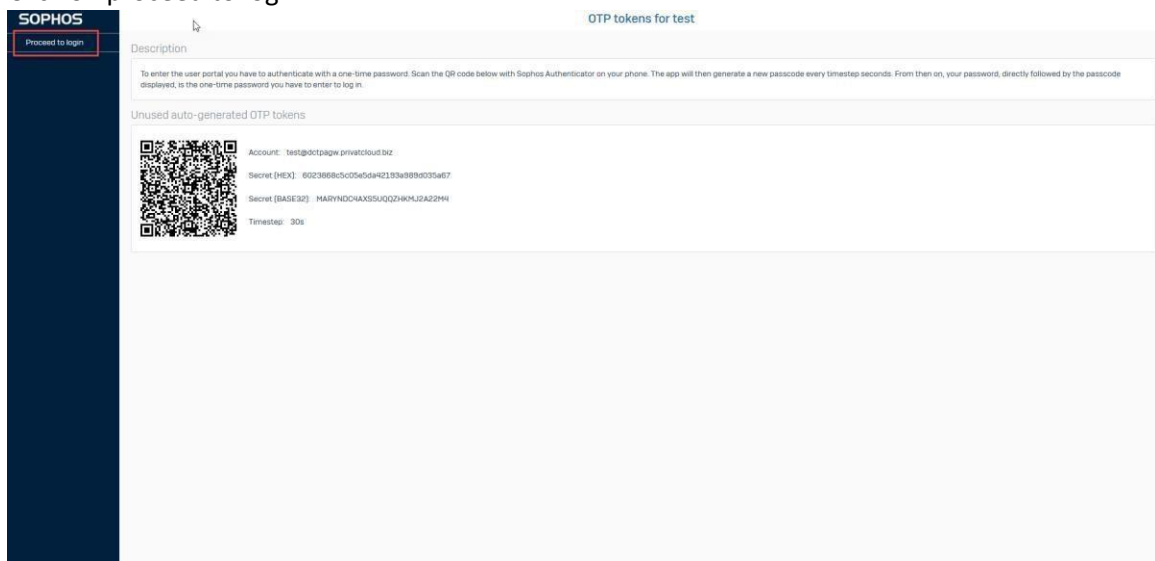

5. Click on scan QR Code and scan the QR Code from the website

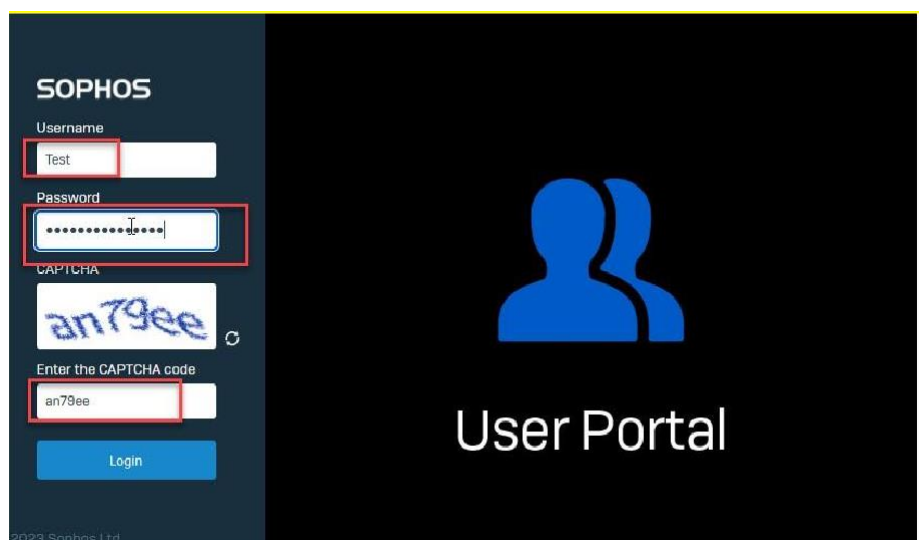

- After that you will see a code in your mobile app that changes every 30 seconds

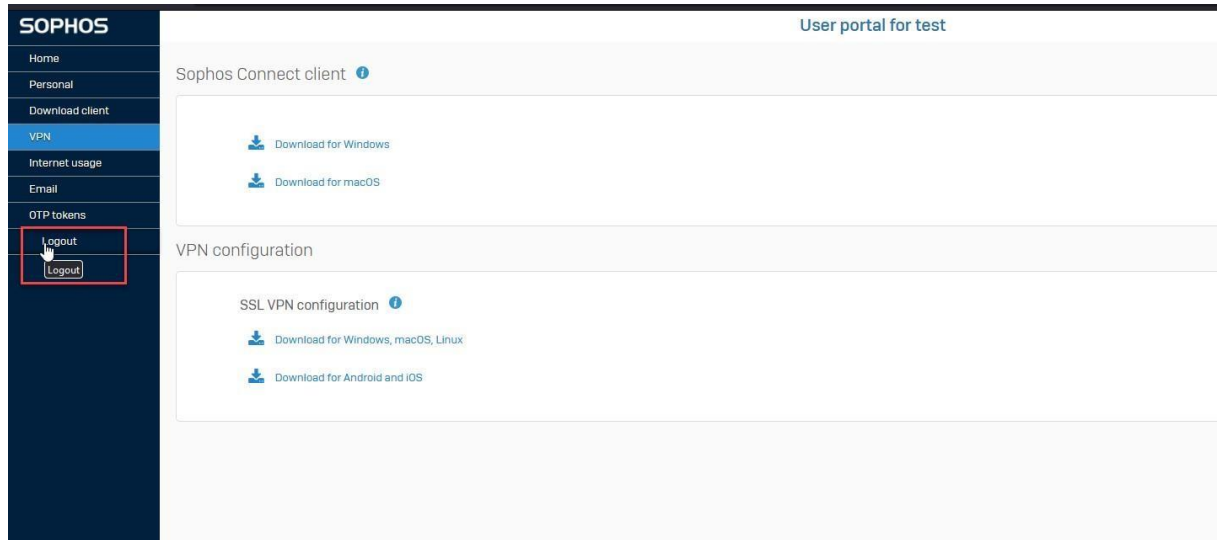

- Click on proceed to login

- Login again. PLEASE TYPE THE CODE FROM GOOGLE AUTHENTICATOR AFTER YOUR PASSWORD.

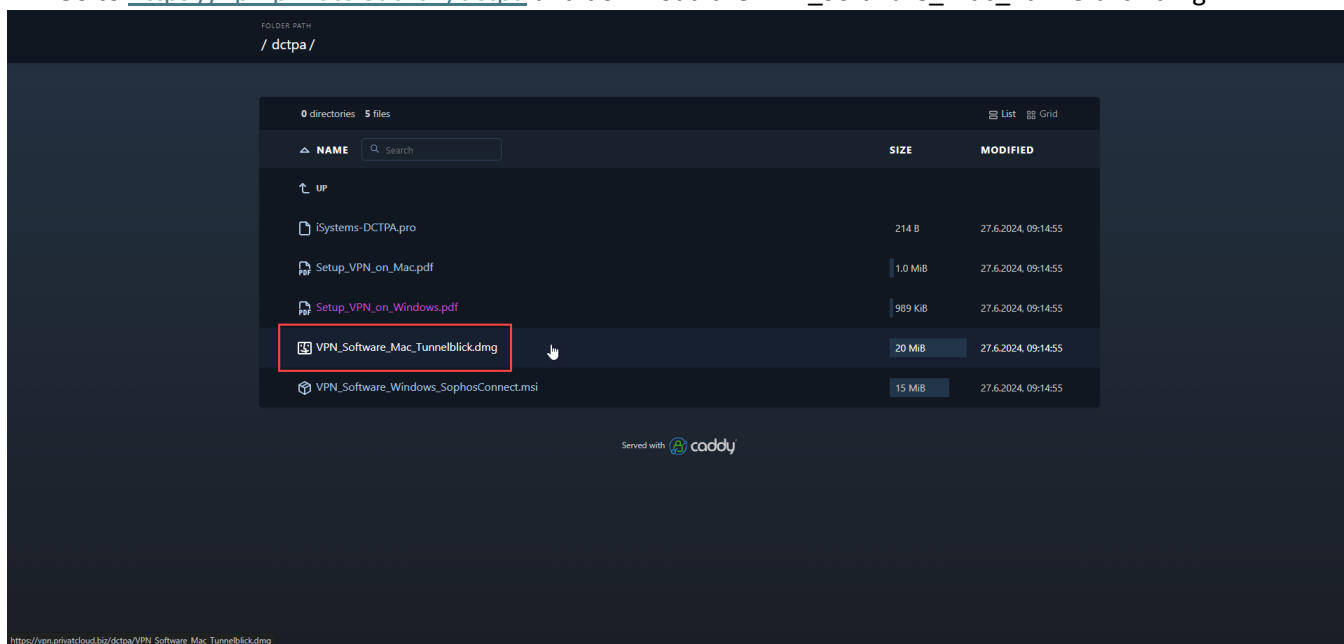

- Now you can login normally. After that you can sign out.

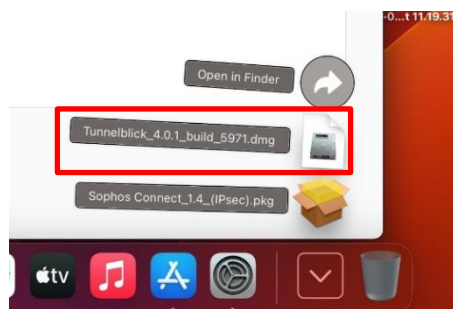

Install Tunnelblick

- Go to <https://vpn.privatcloud.biz/dctpa> and download the VPN_Software_Mac_Tunnelblick.dmg.

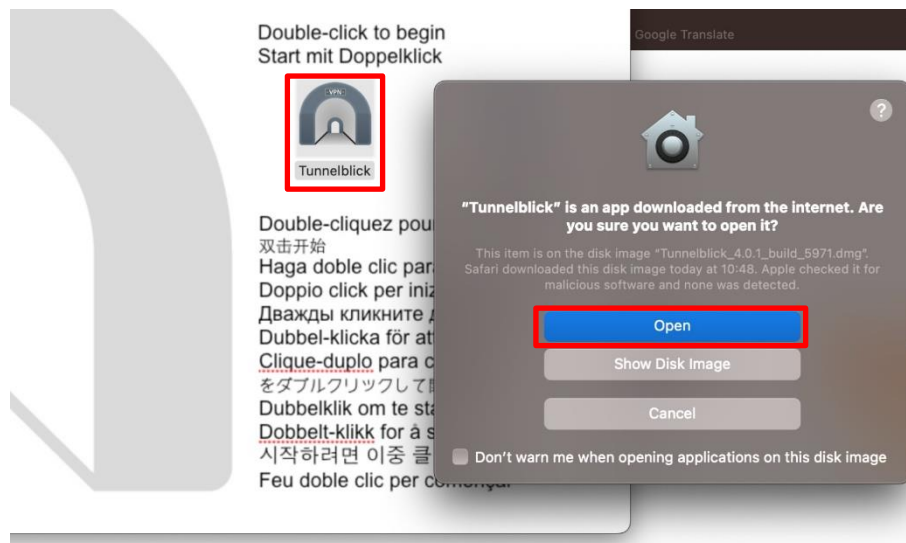

- You will be able to see the setup file under the downloads tab on the lower right side of your screen

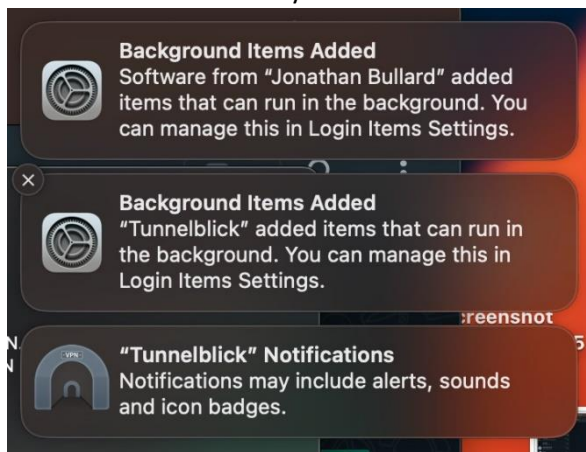

- Once you open the setup file, you will have to double click on the tunnelblick's icon. A new window will

pop up asking if you want to open the file, click open.

4. Once the app has been installed a few notifications will appear on screen showing that tunnelblick was installed successfully.

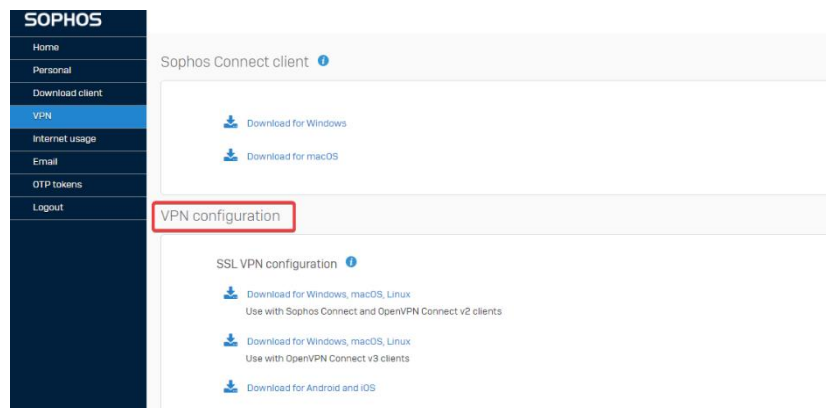

5. To start tunnelblick, go to the Launchpad menu and double click on its icon.

Import the VPN configuration

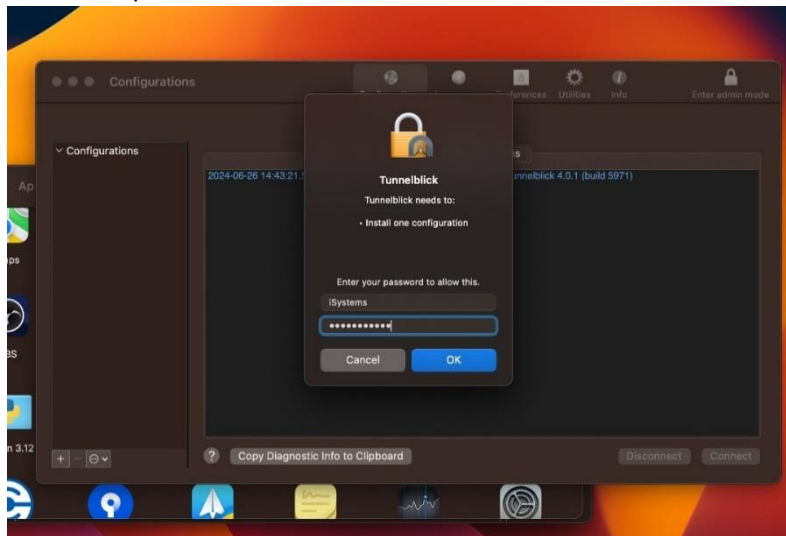

1. Login to your Sophos user portal and download the VPN configuration file.

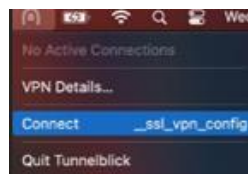

2. Once you have downloaded the configuration file, double click on it.

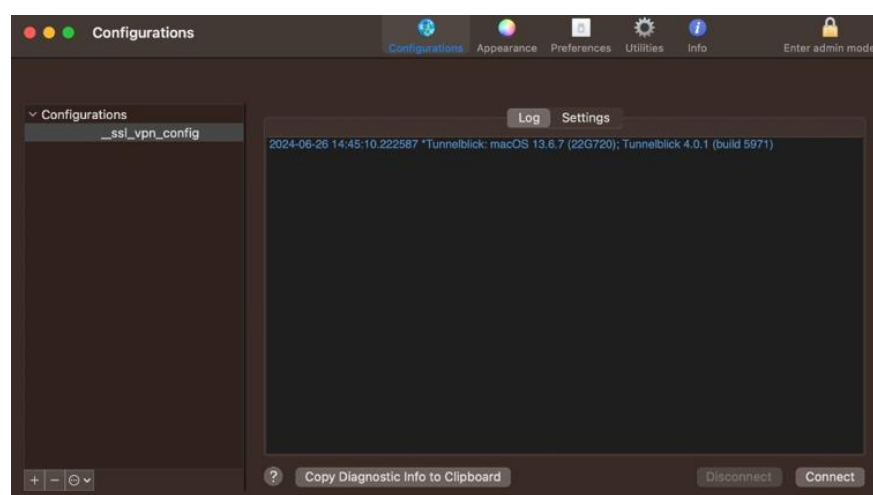

3. A window will pop up requesting for you to allow the file's installation, you will have to type your MAC user's password to continue.

4. Once you have installed the configuration file successfully, click on the tunnelblick's icon located on the upper right side of your screen and select the option VPN Details.

5. A window will open and under the configurations tab you will see that your VPN configuration has been added. You can now press the connect button to start using the VPN.

6. Here you will have to login using your Sophos portal's username and password. (REMEMBER TO ENTER THE CODE FROM GOOGLE AUTHENTICATOR AFTER YOUR PASSWORD.) Click ok to continue.

7. You have successfully connected to your VPN; you can check its status by clicking on the tunnelblick's icon.

Note that some warnings might appear after you connect for the first time, you can simply ignore them as they are not relevant at all.
